The mean average maximum temperatures range from 24.5°C in July to 31.5°C in January with the mean monthly minimum occurring in July at a temperature of 8.5°C.

During the dry season the vegetation is sparse and wildlife congregates around watering holes. During the wet season the vegetation is dense and wildlife is more dispersed. Expect to see the Big Five over the course of a 2-3-night stay.

In addition to the Big Five species that are regularly sighted and enjoyed at close range, animals frequently seen in the Balule Reserve include giraffe, zebra, warthog, spotted hyena, baboon, hippo, impala, kudu, vervet monkey, waterbuck, wildebeest, bush baby, mongoose, duiker and steenbok.

### MALARIA

Before travelling, guests are encouraged to consult their local doctors on anti-malarial medication and preparation, however a repellent stick or spray is effective and should be utilised. All rooms have mosquito nets as an extra repellent.

## WHAT TO PACK

The climate in the Kruger lowveld brings hot summer months between October and April when the rainfall is high, and so is the temperature, reaching over 40 degrees Celsius. The dry winter months begin in May and carry on until October/November, during which time the weather is mild during the day with temperatures averaging mid-high 20s, while very cold in the evenings and early mornings.

- Throughout the year, we recommend packing lightweight, neutral-coloured clothing with short sleeves.
- Bring sun protection in the form of sunblock, sun hats, and glasses.
- Scarfs, jackets and gloves are needed for early mornings on game drive, especially in winter.
- Comfortable walking shoes as well as open sandals for when the weather is hot.
- Bring along cameras, binoculars and recording gadgets to keep a record of the many wildlife sightings.
